

July 29, 2020

Dear Families,

We have now received all of the COVID-19 test results from last Thursday, July 23. We are pleased to announce that all residents and employees tested negative.

We did have one resident who had a false positive and that individual was quarantined immediately to our Isolation Unit. We followed all the appropriate measures to sanitize the household and reduce potential exposure to others. Based off our contact tracing and thorough review, we were not able to determine a source. Therefore, we had the individual retested for COVID-19 multiple times. All of those tests came back negative.

We retested everyone in that household Tuesday and will be retesting everyone else in the building later this week, as mandated by the Kansas Department of Health and Environment (KDHE).

Thank you for your continued understanding and patience.

Sincerely,

Heather Callahan, Community Leader
Sheila Perkins-Koch, Director of Nursing
